Dear Sirs/Madams,

As usual your justice and allegations are misguided and inappropriate. Would you also defile the sanctity of all Intellectual property as monopolistic and predatory? How in a world with freedom to innovate can you be so blatantly non-objective? Would you also expose the formula for Coca-Cola and Colonel Sanders 11 Secret Herbs and Spices? If so what freedom to innovate would I as an Internet software developer have to protect my interests? Because I find a niche market and take advantage of it am I predatory? Is the effervescent struggle between Coca-Cola and Pepsi the next target for your insane jealousies and obvious favoritism for Sen. Oren Hatch's and Time Warner's Quest for more dollars and favoritism because their product is without Office applications and without a viable desktop graphical operating system? Is this fair? No it is predatory with respect to you and your quest.

Sincerely,

William "Bill" Richardson
Chief Operating Officer
